

The Boy on His Vacation

should have the clothes best suited to his environments.

Of course a little different trousseau would be necessary in visiting fashionable resorts, from a "quiet" place in the country.

We can equip him, whichever way he's going.

Broken Pieces Have Sway

Here To-Day and Saturday

SAILOR BLOUSE, DOUBLE-BREADED AND ETON SUITS, IN MIXED CASSIMERES, BLUE SERGES, ETC., 2 1/2 TO 8 YEARS, WORTH \$5.00..... **\$2.85**

SAILOR AND ETON BLOUSE AND DOUBLE-BREADED SUITS, WORTH \$5.00 TO \$7.00, SIZES 8 TO 17 YEARS, AT..... **\$3.50**

HIGH-GRADE DOUBLE-BREADED SUITS, IN BLUE SERGE AND MIXED CASSIMERES, ALL SIZES, WORTH \$7.50 AND \$8.00, AT..... **\$4.75**

Boys' and Children's Washable Suits.

Don't belittle your boy by dressing him in a faded, ill-shaped Wash Suit. A suit from us at 95c, \$1.45 or \$2.50, will last three times as long as one costing half as much—and look better through it all, too.

Ours are man-tailored; and possess an air of refinement apart from the ordinary.

Suits, 95c to \$3.50.

All the other summery things for your boy, in town or in the country, from Sandals to Mexican Hats.

O. H. Berry & Co.

heart, and to this whole company I present with great pleasure Mr. J. Stewart Bryan, whose public spirit, spotless character and growing usefulness for the good of the community as a model citizen of the Northside.

Mr. Bryan's Tribute.

Mr. John Stewart Bryan, of the Brookland School Board, the next speaker, paid a high tribute to the citizens of Barton Heights, whose wise patriotism, unselfish desire for the betterment of school facilities and large-hearted generosity had made the new school possible. "It is one of the most comforting and inspiring experiences possible," said Mr. Bryan, "to see the parents and the trustees working together, as we have worked for so vital a cause as the improvement of the school at Barton Heights."

Continuing, Mr. Bryan said: "After three years of consultation, discussion and planning we are at last able to celebrate in fitting and solemn manner the formal dedication of Barton Heights High School. Only those who dreamed and toiled and thought and wrought together that this end might be accomplished know how much the endeavor and hope and faith are symbolized by these foundations. The problem at the beginning was not simple. In Brookland District at least the children had increased far more rapidly than the school accommodations and the acute pressure of their bright and intelligent faces demanded for them an opportunity to use their faculties, plastic and irreplaceable childhood hours to the fullest possible extent. It was a sign neither of public spirit, nor unusual presence to earnestly desire that those children might be developed to their highest capacity and given the means to do so themselves for what ever station they might be called to fill, no matter how honorable, how exacting or how important, that work might be. Nor was this thought the property of any man or set of men or women. The school board saw the children and felt the need of greater material equipment. So also did the parents, and themselves commemorate the first fruits of these hopes. To-day's victory over the material problems of finance and site and plans is inspiring and very real. Behold our spires, we can say."

Immutable Law Behind.

Of the meaning of this movement Mr. Bryan said: "It is the mark of a thoughtful and deep mind to look beyond the outward manifestation to the immutable law that lies behind."

"To-day we have in this celebration a striking example of this deep insight. Other schools, both larger and smaller, have been built and other communities have assembled to come together with praise and thanks, to bless their work and wish it Godspeed in its noble effort to make life fuller and better for scholars not yet born. We cannot, therefore, measure this event by its mere material greatness. To gain a true idea of what this building stands for we should look beyond the bricks and mortar, and look further than the foundation plans or roof, and seek, if possible, to find what spirit made this building possible and to what end and for what purpose it was constructed. It was just this sort of symbolism. It was in

congratulating them.

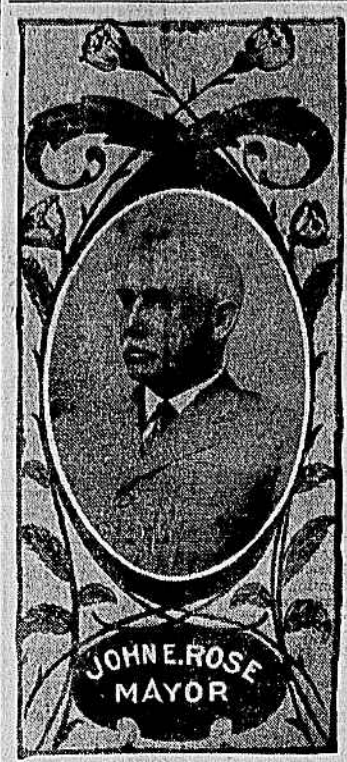

After the school children had sung "The Flag of the Free," Mayor Rose introduced Lieutenant-Governor Elyson, who spoke in part:

"Mr. Mayor, Ladies and Gentlemen: I congratulate you, my fellow-citizens of Barton Heights, upon this auspicious occasion, and I more cordially felicitate myself that I have been permitted by your courtesy to share its pleasure."

"The erection of your new school building is no ordinary event; for it means better things for the boys and girls of this growing and prosperous community. We are at the beginning of a great educational movement, which

has its being in simple devotion to Virginia's great army of children, and through them to the future of the Commonwealth. What the children are to be depends upon the schools, and the character of the schools will be determined by the quality of those to whom they are entrusted. Dr. Ruffner was accustomed to say: 'As the teacher, so is the child.' The world always knew there was a difference in teachers, but it was a long time in finding out that a poor teacher was doing harm and not good."

In concluding his address Mr. Elyson said: "The best people of all classes are going to the future of the Commonwealth. What the children are to be depends upon the schools, and the character of the schools will be determined by the quality of those to whom they are entrusted. Dr. Ruffner was accustomed to say: 'As the teacher, so is the child.' The world always knew there was a difference in teachers, but it was a long time in finding out that a poor teacher was doing harm and not good."

best means to promote the prosperity of the South.

"Your example be an inspiration to others, and the time speedily come when Virginia shall find her rightful place as the center of the South, that was the vision of the children of the South, and the wisest provision for the training and education of all their children."

Mayor's Greeting.

Mayor McCarthy made a purely formal speech, in which he said that he brought greetings from the people of Richmond, whose memories and traditions were the same as those of the citizens of Barton Heights. He rejoiced, he said, with the people of the neighboring town because they had so successfully carried out the laudable enterprise of building a splendid public school, which would equip the children of the community to go out into the world and gain success. In concluding he said:

"I pray that it may realize for you and your children your very brightest hope."

After a musical selection, Dr. S. C. Mitchell, of Richmond College, one of the best known educators of the South, was introduced. Dr. Mitchell began by saying that he had visited the past few days visited Dr. Ruffner, the father of the public schools of Virginia, at his home in Lexington. He described the aged educator as one of the greatest of the few decades that they ever did before. It is certain to be so, in the nature of things. They have the unworked minerals, the untitled soil, the unused water power. Their opportunities for manufactures have not been half tested. Both countries are assured of a prosperous future. Both must continue to lean heavily upon the United States for the aid they need in their development.—Cleveland Leader.

Leather Exports to Australasia.

A correspondent, writing from Sydney, Australia, to the London Commercial Intelligence, says:

Americans are complaining that while their leather exports show a considerable increase in Europe, Asia and elsewhere, the quantity taken by Australasia, is steadily declining. It is the same with American boots and shoes, the value of the Australasian imports sinking from \$1,338,410 in 1900 to \$385,652 in the calendar year 1905.

Suez Canal Receipts.

Consul J. C. McNally sends from Liege a newspaper statement that the gross tonnage of the ships which passed through the Suez Canal in the first quarter of the present year was 4,334,346 tons, against 5,139,424 tons in 1905, and 4,618,829 tons in 1904. The net tonnage in the three years, respectively, was 3,827,213, 3,701,145 and 3,808,539 tons. The tonnage dues received were \$5,245,000 in 1905, \$5,008,181 in 1904, and \$5,000,000 in 1903. The passenger receipts in the two years amounted to \$189,000 and \$128,940, respectively.

The "Unlucky" Number.

Representative John Sharp Williams before he came to Congress was a member of a board of visitors to the State prisons of Mississippi. He with others was making a tour of the penitentiaries and saw a dejected-looking convict sitting in his cell.

"What's the matter, my man?" asked Mr. Williams.

"Nothin' much," the convict said; "only I'm a victim."

"In a victim of the finger thirteen—a judge and twelve jurymen."

the scheme, Mr. Jefferson had builded only the apex, the university, while the foundation, the public schools, was entirely lacking.

"President Alderman, more than any man that I know, is building in that foundation," exclaimed the speaker.

Dr. Mitchell said he stood for three things in education:

1. The education of the "poor whites."
2. The democratization of colleges.
3. The education of the negro; and rejoiced that education was no longer monopolized or exclusive, but was as pure as the air of heaven.

In conclusion, Dr. Mitchell said that it was a most significant fact that at this time, in 150 localities in Virginia, men and women are dedicating school buildings.

"Dixie" was sung by the children, all the audience standing uncovered, after which Rev. Mr. Hayes pronounced the benediction, which brought the ceremonies to a close.

Decreased Exports to the Orient

The export trade to the Orient decreased sharply in April, but it is still an unsettled problem as to whether this decrease is the direct effect of the Chinese boycott of American goods, or whether it arises from some other causes. Shipments to China from the United States were not affected much more than shipments to other Oriental countries. The exports to China in April were valued at \$3,280,546, as against \$7,306,724 in the corresponding month of last year. It is to be considered, however, that in April, 1905, there was a great demand for American products, far above the normal, and it was not expected at the time that the high market would be maintained. The shipments to China in April of this year, although far below those of the same month of 1905, were still much higher than the monthly average for years prior to 1905.

The exports to Japan in the month of April decreased by a larger ratio, from \$2,477,220 in 1904, to \$1,200,000 in 1905. There is no boycott in Japan. Other decreases in exports to Asia are conspicuous in the official record. For the first four months of the present year the exports to China were only \$5,000,000 less than in the corresponding months of the preceding fiscal year, while to Japan there was a decrease of over \$4,000,000.

Our Prosperous Neighbors.

North of the United States there is remarkable growth and prosperity. South of the Mexican frontier the progress of a naturally rich country is one of the most remarkable features of the industrial and commercial world. Both of the big neighbors of this republic are having the best times in their history. This fact is one of the strongest reasons for counting upon continued activity in the great industries of the United States. Both Canada and Mexico are important and fast-growing markets for American merchandise. They are also notably progressive in their methods of production, and the best memories and traditions were the same as those of the citizens of Barton Heights. He rejoiced, he said, with the people of the neighboring town because they had so successfully carried out the laudable enterprise of building a splendid public school, which would equip the children of the community to go out into the world and gain success. In concluding he said:

"I pray that it may realize for you and your children your very brightest hope."

WALTER D. MOSES & Co.

OLDEST MUSIC HOUSE IN VIRGINIA
103 E. BROAD ST.

Learn What the Home Folks Think of the Pianola.

It's true that the world's greatest musicians all praise the Pianola and Pianola Piano—that hundreds of schools and colleges use them in their musical departments. In fact, that all music lovers recommend them.

But we want you to ask your FRIENDS and NEIGHBORS what THEY think of these instruments! See if they don't tell you that the Pianola and Pianola Piano pay a bigger pleasure dividend than any known instrument.

Scores of Homes Right About You Contain a Pianola or Pianola Piano

You know the Metrostyle Pianola can be attached to any piano, and that the Pianola Piano has a Pianola built inside its case. In no case is hand playing interfered with.

If you want to enable yourself or family to play any piece at once, place a Pianola or Pianola Piano in your home.

Pianolas, \$250; Pianola Pianos, \$550, upwards. Easy monthly payments. We are sole agents here.

This is the Moses line of Pianolas:

Steinway, Hardman, Kimball, Standard, Haines, Weiser, Brewster, Hensel.

TRAIN ELEPHANTS TO BE ATHLETES

Must Be Prepared for Circus Work With Same Care That is Given Prize Fighters.

HOW TASK IS ACCOMPLISHED

Old Circus Man Explains "Physical Culture" Method That is Used.

NEW YORK, June 21.—"Elephants—that is, trained elephants no matter where you find them, are physical culture graduates," said Ruben Schubert, an old circus elephant trainer, recently. "With out their physical culture training they would be babies for our work. Once graduated, they perform marvelous tricks and feats that to the novice, merge almost upon the impossible."

"We prepare the muscles and sinews of an elephant before we compare to impart the tricks to him. An elephant when first taken into captivity and turned over to the trainers in the permanent circus quarters in Germany may be big and strong—possessed of sufficient power to tear a hole in a brick building—yet he is unable to stand on his hind legs or balance himself on his head. Even if he knew just what we wanted him to do and tried ever so hard to accomplish it, he would fall until he went through a course of our physical culture training."

"The sinews and muscles of his neck, his trunk, fore legs, hind legs and thighs must first be developed, and he is trained similarly to a prize fighter or a college athlete. These sinews and muscles are built up gradually. First the elephant is placed in a sling, and by means of a tackle is drawn off the ground. Then he is let down until only his fore feet touch terra firma."

"The method is then reversed, and the hind quarters are allowed to rest on the ground. Daily this training is used, and daily the elephant is made to rely more on his legs than on his swing. This method serves to build up the muscles. It enlarges and hardens them, until finally we pronounce them fit, and Mr. Elephant is made to realize that he must rear upon either his front or hind feet without the aid of the swing."

"The muscles of the neck and trunk are yet to be developed. For the building up of the neck we instruct the elephant in the art of moving wagons by pushing them with his head. A heavy pad is fitted about his forehead to prevent bruising the flesh. The work of this kind speedsily develops the muscles. It enlarges and hardens them, until finally we pronounce them fit, and Mr. Elephant is made to realize that he must rear upon either his front or hind feet without the aid of the swing."

about with his twinkling little eyes for the bread or carrots.

"Heavier objects are substituted day by day, and soon we have the satisfaction of seeing the trunk grow from a mere flabby pudge of skin into an arm, as it were, as knotty and well muscled as that of a Barmen."

Imports Increasing at Panama.

Consul J. C. Kellogg, of Colon, reports that the import duties collected at Panama City, Colon, and Bocas del Toro for the first three months of 1906 greatly exceeded those for the last quarter of 1905, the figures being:

Collections on merchandise by the Republic of Panama at these ports during the quarter ended March 31, 1906, aggregated \$132,877, against \$122,639 for the previous quarter. The duties collected on liquors for the quarter ended March 31, 1906, were \$75,446, an increase of \$10,941 over the previous quarter. The total increase of revenue was, therefore, \$21,579, with no change in the import duties.

Natural Mistake.

We stop on the sidewalk and look at the man who is digging the narrow, deep, long excavation.

"Is somebody going to establish a cemetery here?" we ask in surprise.

"What?" replies the man with the spade. "Naw! This is the basement for the new Vestibule Apartment House."—Puck.

THE WEATHER.
